

Dr. Stanley F. Malamed

2 Continuing Education Points

Local Anaesthesia — Articaine

Local anesthetics form the backbone of pain control techniques in dentistry. Lidocaine, mepivacaine, prilocaine and bupivacaine have become the mainstays, however the more recent introduction of Articaine has added a new dimension to pain control in dentistry.

Learning Outcomes

In this program, Dr. Malamed will:

- Review and describe the clinical differences between the currently available local anaesthetics.
- Discuss in detail the newest local anaesthetic - Articaine - its clinical profile and advantages..
- Discuss the efficacy of Articaine HCl when administered by infiltration in the adult mandible.
- Discuss the question and controversy over lingual nerve paraesthesia following local anesthetic administration with emphasis on Articaine.

BIOGRAPHY

Dr. Stanley F. Malamed was born and raised in the Bronx, New York, graduating from the New York University College of Dentistry in 1969. He then completed a dental internship and residency in anaesthesiology at Montefiore Hospital and Medical Center in the Bronx, New York before serving for 2 years in the U.S. Army Dental Corps at Ft. Knox, Kentucky. In 1973, Doctor Malamed joined the faculty of the Herman Ostrow School of Dentistry of USC, in Los Angeles, where today he is Professor of Anesthesia and Medicine. Dr. Malamed is a Diplomat of the American Dental Board of Anesthesiology, as well as a recipient of the Heidebrink Award (1996) from the American Dental Society of Anesthesiology and the Horace Wells Award from the International Federation of Dental Anesthesia Societies, 1997 (IFDAS).
