

Susan S. Wingrove
RDH, FADIA

2 Continuing Education Points

Implant Maintenance and Peri-Implantitis

Gain an understanding of the science of implant dentistry, placement, and restoration. Learn a **system** for successful peri-implant maintenance, assessment, instrumentation, and monitoring for all the challenges of implantology. Attain the **verbal skills** to talk with patients about the Risk, Benefits, and Alternatives (RBA) to replacing missing teeth with dental implants and case acceptance for happier healthier patients.

Educational Objectives

- Have an understanding of the four different types of implants, their history, and how implants are placed using **today's technology**.
- Learn the current considerations to assess an implant with protocols for probing/radiographic monitoring, and **recognise the signs of peri-implant disease (mucositis/peri-implantitis) and complications**.
- Understand the considerations in performing **safe implant maintenance**, the proper instruments that can be used, and how to meet all the instrumentation challenges of implantology.
- Attain the **verbal skills** to effectively talk with patients about their treatment options and how choosing implants could be their best long-term treatment of choice for missing teeth.

BIOGRAPHY

Susan Wingrove an International speaker and practicing dental hygienist who does regeneration research as a consultant for Regena Therapeutics, and instrument design for Paradise Dental Technologies, Inc. She is the designer of the **Wingrove Implant Series, ACE probes, and Queen of Hearts instruments**. She is a member of the Academy of Osseointegration, American Dental Hygienist Association, International Federation of Dental Hygiene,

The Implant Consortium, and published author on Implant dentistry. She has been published in the British Society of Dental Hygiene, on the Editorial Board for Dentition Journal Omega Inc. India, Hygienetown Journal, Columnist for Inclusive Magazine published by Glidewell Dental, and textbook for Wiley-Blackwell publishers; **Peri-Implant Therapy for the Dental Hygienist: A clinical guide to Implant Maintenance**.
