Silver Fluoride by Cathy Boyce

**1 Points CPD General**

ADOHTA QLD Meeting

BRISBANE

## Silver Fluoride by Cathy Boyce

Cathy is an Oral Health Therapist who graduated from Sydney's Sylvania School of Dental Therapy in 1980. She has enjoyed a long and rewarding career in the dental profession working in many aspects of dentistry in both public and private clinics.

Cathy has worked with both modes of silver fluoride materials which are available for use in Australia (CSDS and Riva Star) extensively in both her public and private clinical settings and soon realised that silver fluoride use had become an integral part of her approach to caries management. By September 2017 the ARM-ER approach to caries management (using silver fluorides) was articulated and is currently being used to guide clinicians and clients through their own journey of discovery into the how, when and why's of silver fluoride uses in Australia. Cathy is passionate about improving the health outcomes for all her patients and for yours as well.
